PERSONAL STATEMENT

As an enthusiastic lifelong learner, I am deeply committed to gaining and sharing knowledge. My experience working as a developer since 2021 has taught me the value of effective teamwork, which I prioritize in all my endeavors. Currently, I am a full-time Developer at TO Brasil, but I also do freelance work through Upwork and work on side-projects with my friends.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript/TypeScript, Python 3, Java.
- **Front-end development:** HTML, CSS, ReactJS, NextJS.
- **Back-end development:** NodeJS, ExpressJS, NestJS, Docker, Puppeteer.
- **Mobile development:** React Native, Expo Go.
- **SQL Database:** PostgreSQL, SQL Server, MySQL/MariaDB, SQLite.
- **NoSQL Database:** MongoDB.
- **ORM/ODM/Query Builder:** PrismaJS, Knex.js, Mongoose, Sequelize, TypeORM.
- **Other tools:** Git, Swagger, Jest, Storybook, NVM.

WORK EXPERIENCES

Developer at **TO Brasil** January 2023 – Present

I joined TO Brasil as a Developer, where I work maintaining databases using TIBCO Data Virtualization for the customer Petrobras, where I create views, manage several data sources, and generate insights according to the customer need. In parallel, I had intense training in Data Modeling, Power BI, Data Science, and other technologies.

Software Engineer at **Kodde** January 2022 – November 2022

I joined Kodde as a Software Engineer, where I maintained and implemented new features for the front-end and, especially, the back-end in several projects. In the project Madalu, we built web and mobile services that connect people to salons by scheduling services. The salons will be able to manage the employees, their branches, and their schedules. In this project, I participated in the creation of business rules, and the construction of the API using ExpressJS through NestJS, I did the documentation using Swagger and worked with data using Prisma and PostgreSQL. In other projects, I created tests using Jest and Storybook.

Trainee at Tata Consultancy Software (TCS) July 2021 – January 2022

I joined the company as an intern where I received training in HTML, CSS, JavaScript, SQL, Object Oriented Programming, and JAVA. Due to my good performance in the internship program, I became a trainee and started to provide consulting services for Roche using OutSystems.

EDUCATION

Bachelors in Computer Science, UENP March 2017 – December 2023

Proficient in English, Wizard Language School February 2010 – December 2016

High School, Vinícius de Morais February 2014 – December 2016
